PROFESSIONAL SUMMARY

Software Engineering student (1st year) with experience in web development and API integration. Skilled in React, TypeScript, and dashboard design. Currently exploring different areas within software engineering to identify the specialization that best aligns with my ambitions and interests. Particularly interested in database design, web development, software architecture, and embedded systems.

Projects

Personal Projects — Full-Stack Development Remote Aug 2025 – Feb 2026

- Built an **Analytics Dashboard** (Live Demo) using Next.js, TypeScript, and MongoDB.
- Implemented Excel upload, data parsing, filtering, and JSON export features.
- Designed interactive data visualizations to support decision-making and analysis.

Web Development Intern — YottaByte Remote Jul 2025 – Aug 2025

- Developed a web application integrating multiple external APIs (6–10 public APIs) using Express.js.
- Designed and implemented a customizable dashboard interface for data visualization.
- Built API calls and handled data aggregation to provide real-time insights.

Final Year Project — SW Consulting Monastir, Tunisie Jan 2025 – Jun 2025

- Designed and implemented a custom programming language SourceLang Programming Language(Documentation).
- Built a full transpiler pipeline: lexical analysis, parsing, and AST generation using C, Flex, and Bison.
- Applied concepts of compiler design, memory management, and syntax tree transformation.

Administrative Intern — ISIMM Monastir, Tunisie Jul 2024 – Aug 2024

- Digitized and archived academic records (exam reports, administrative documents).
- Scanned and organized historical documents to ensure accessibility and data preservation.
- Maintained structured document storage for efficient retrieval and management.

Software Engineering Intern — WebProSoft Monastir, Tunisia Jun 2024 – Jul 2024

- Developed a desktop/web image recognition platform using .NET (C#), HTML, and JavaScript.
- Integrated Azure AI models for image classification and analysis.
- Designed a user-friendly interface to facilitate interaction with AI features.

EDUCATION

M.Eng **Sousse University, Higher Institute of Applied Sciences and Technology of Sousse**, Software Engineering — Sept 2025 – In Progress

BS **University of Monastir, Higher Institute of Informatics and Mathematics**, Computer Science and Software Engineering (with honors) — Sept 2022 – June 2025

TECHNOLOGIES

- **Languages:** C, Java, Python, C++, C#, JavaScript, TypeScript, SQL (PL/SQL)
- **Frameworks & Libraries:** React.js, Next.js, Express.js, .NET
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Development Tools & Practices:** Git, GitHub, Agile/Scrum, MVC Architecture, Object-Oriented Programming (OOP), CI/CD,Linux
- **Networking:** CCNA 1 Certified

LANGUAGES

Arabic – Native | English – Professional | French – Professional

INTERESTS

Motorcycle Riding | Film & Cinema
